

Accounting

When you are busy managing the ins and outs of your business, it is not always practical or effective to have a dedicated internal resource to manage the accounting function and complete all statutory obligations of a business.

Whether you are short on time, resources or experience, you may find it more beneficial to have the fresh perspective and expertise of an accounting team to manage essential tasks on your behalf.

GM Accounting's compliance services include:

Business Services

- Preparation of annual Financial Statements ensuring external reporting obligations and statutory obligations have been completed in a timely and accurate manner.
- Preparation and advice on all types of Tax Returns
- Monitor cash flows, report on actual to budget profitability
- End of financial year adjustments
- Set up and manage appropriate Business Structures to suit your needs

Management Reporting

- Monthly, Quarterly management accounting and reporting
- Consolidation for groups
- Cash flow management
- Development and reporting on Key Performance Indicators and Profit Drivers.
- Benchmarking with your industry

Company Secretarial

- Corporate Register maintenance
- Lodgment of relevant documents with the Australian Securities and Investments Commission (ASIC)
